

# ANALYST FOR FUNCTIONAL AND PREVENTIVE MEDICINE (w/m/d)

Full Time - Karlsruhe, Germany

## About Forever Healthy

Forever Healthy is a private, non-profit initiative with the mission to accelerate the availability of human rejuvenation therapies and enable people to vastly extend their healthy lifespan.

Through our '[Rejuvenation Now](#)' and '[Maximizing Health](#)' initiatives we seek to continuously identify and evaluate new rejuvenation therapies with reference to their risks, benefits, and potential application and to harness the enormous wealth of the world's cutting-edge medical knowledge to empower informed decisions about health and well-being.

Our "[Health & Longevity Strategy](#)" combines the results of "Rejuvenation Now" and "Maximizing Health" with the latest knowledge from selected experts to create a step-by-step guide on how to maximize our health, well-being, and longevity right now.

Our acclaimed [Undoing Aging](#) conference annually brings together pioneering scientists and startups from around the globe, who are leading the charge in maintaining and restoring full health in old age.

In addition, Forever Healthy supports the development of rejuvenation therapies that undo the damage of aging by [funding basic research](#) and [mentoring startups](#) that work on therapies for human use. In addition to the first generation of rejuvenation therapies, there is already a vast amount of cutting-edge medical knowledge that can be used right now to maximize our health and well-being.

## Responsibilities

- You will be responsible for systematically reviewing, researching and structuring the world's leading medical knowledge on various health-related topics
- Your work will cover a wide variety of subjects such as nutrition, lifestyle, detox, mental well-being, genetics & epigenetics, supplementation, functional medicine, personalized prevention and early detection
- You will create "Practical Guides" to turn inaccessible knowledge into actionable information and empower informed decisions about health and well-being
- Your findings will be published "open access" as part of [Forever Healthy's public knowledge base](#) and utilized by doctors around the world

## Requirements

- University degree in medicine (MD, Dr. med, Dipl. med, MBBS)
- strong scientific curiosity, particularly for prevention, functional medicine, and early detection
- excellent analytical skills
- solid understanding of research methodology
- ability to turn knowledge from multiple sources into well structured, actionable information
- good writing skills
- proficiency in English

## Work Environment

- work in a fast-growing, extremely promising field
- collaborate with leading international experts in the functional and preventive medicine community
- gain global visibility for your work
- a start-up culture where continuous learning is key
- vast opportunities for professional and personal development
